1-6. Levels of work

Postal operations in the field are performed at three primary levels: unit, battalion, and installation (or some equivalent organization in the tactical force). The main focus of the guidance in the first edition of this regulation is on unit and battalion levels.

1-7. The Postal Operations Program

The Postal Operations Program is a military personnel function that provides the unit commander with guidance for processing personal mail in the field, in support of DODPM 4525.6-M, Volume II (which takes precedence over this regulation in the event of conflicting guidance). The program consists of the following subfunctions:

c. Support the Army's personnel life cycle function of sustainment.

1-9. Standards of service

a. *The Postal Operations Program.* This program—

- (1) Is a wartime military personnel process.

- (4) The delivery network will connect command and control headquarters and the postal units with daily delivery service whenever possible.
- (5) The postal network will provide delivery service to units of the allied forces when called for by international or bilateral agreements with the United States (U.S.).
- (6) Army postal units will be deployed on the battlefield as an integrated part of the personnel service support network.

- (10) The postal network will provide delivery service to units of other U.S. Services as required by interservice support agreements.

c. *Postal finance services.*

- (1) Personal packages will not be accepted or moved in the network until a base operations (BASOPS) force can be established to sell stamps and process packages.
- (2) Official mail will be metered until it is no longer practical.
- (3) Money order and stamp sales will be discontinued effective with the declaration of free mail.
